As a global leader in data infrastructure, we aren’t just envisioning the future; we are working to create it. We believe we have a unique opportunity to unlock the power of data and tackle the world’s largest sustainability challenges. This belief is reflected in our company vision, “architecting how data enables the world to solve its biggest challenges.”

Western Digital’s 2018 Corporate Sustainability Report offers insight into how we are architecting a better future. The report focuses on the sustainability issues most significant to our company and stakeholders through six strategic focus areas.

To read our full report, visit Western Digital’s Corporate Sustainability webpage at westerndigital.com/company/corporate-sustainability.

We welcome any questions or comments via email at sustainability@wdc.com, or connect with us through social media.

Western Digital®, architecting how data enables the world to solve its biggest challenges. As a leader in data infrastructure, we accept the responsibility to empower people and systems that depend on data. Western Digital’s data-centric solutions are comprised of the Western Digital, G-Technology™, SanDisk®, and WD® brands. www.westerndigital.com
Our environment affects all of us, individually and collectively. As we look to the future, Western Digital recognizes environmental stewardship is critical to the long-term welfare of our company, our customers and other stakeholders.

30% decrease in energy intensity since 2016
33% decrease in greenhouse gas emissions for HDD products since 2016
16% decrease in greenhouse gas emissions for SSD products since 2016

The need for greater transparency is clear as global interconnectedness is greater than ever. Our supply chain management includes a commitment to engage with suppliers and key stakeholders to ensure that our supply chain is socially responsible and sustainable in the long run.

1st in the HDD manufacturing industry and 4th in the overall computer hardware industry in Responsible Sourcing Network’s 2018 Mining the Disclosures Report

At Western Digital, working with integrity is a part of our culture—one that we work hard to maintain and enhance. These efforts help earn the trust of customers and business partners, inspire employees, deliver value for shareholders and improve our communities.

We believe that corporate sustainability should go beyond environmental and labor considerations to provide a positive social impact on the local communities in which we operate, which has led us to an impact-focused worldwide giving and volunteerism program.
