**Ultrastar® SSD800MH**

### Highlights
- MLC NAND Flash for ultra-high performance and endurance
- Endurance: 25 drive writes per day (DW/D) for five years
- Best IOPS/Watt for reduced TCO
- 12Gb/s SAS interface for maximum throughput
- Advanced power loss data management technology
- Self-encrypting models conform to TCG’s Enterprise specification

### Applications/Environments
- Ultra-high performance tier-0 enterprise storage
- Enterprise-class servers and high performance computing
- Space and/or power constrained environments
- Online Transaction Processing (OLT)
- Financial and e-commerce
- Database analytics

### Maximum Performance, Reliability and Endurance
The Ultrastar SSD800MH delivers high sequential throughput, up to 1200MB/s read and 750MB/s write (12Gb/s SAS). The Ultrastar SSD800MH also delivers up to 145,000 read and 100,000 write IOPS, reaching speeds >100 times faster than HDDs and double the speed of current 6Gb/s SSDs, allowing rapid access to “hot” enterprise data for improved productivity and operational efficiency. The Ultrastar SSD800MH family offers significant value in terms of IOPS per Watt, while reducing total cost of ownership (TCO) through low power consumption, efficient cooling and reduced space requirements.

**Benefits**
- Improved performance with higher power option
- More capacity for less space and power
- Reduced field replacement effort
- Enhanced error detection and correction for optimal data integrity
- Protection against flash die failure
- Assures data integrity during power failure
- Maximum endurance over the life of SSD

**Features**
- 6Gb/s Active-Active Dual Port or 12Gb/s Single/Dual port for enhanced reliability
- Highest write performance and endurance
- Maximum throughput and IOPS for ultra-fast access to data, >100x faster than typical HDD

**Highlights**
- Maximum performance over the life of SSD
- Assures data integrity during power failure
- Unlimited reads, up to 36,5PB random writes (800GB)

**Specifications**
- 800GB, 400GB and 200GB | MLC
- 2.5-inch SFF | SAS 12Gb/s

**Protection against flash die failure, parity-checked internal data paths without an external write cache, and an exclusive power loss data management feature that does not require supercapacitors.**

The Ultrastar SSD800MH family is backed by a five year limited warranty, or the maximum Petabytes (PB) written (based on capacity).

**HGST Quality and Service**
HGST’s Ultrastar SSD800MH family extends the company’s long-standing tradition of performance and reliability leadership. A balanced combination of new and proven technologies enables high reliability and availability to customer data.

HGST drives are backed by an array of technical support and services, which may include customer and integration assistance. HGST is dedicated to providing a complete portfolio of SSD/HDD solutions to satisfy today’s monumental computing needs.
## Specifications

### Model / Part No.
- HUSMH8080ASS200 / 0B28630
- HUSMH8040ASS200 / 0B28629
- HUSMH8020ASS200 / 0B28628
- HUSMH8080AS201 / 0B28633
- HUSMH8040AS201 / 0B28632
- HUSMH8020AS201 / 0B28631
- HUSMH8080AS204 / 0B30068
- HUSMH8040AS204 / 0B30067
- HUSMH8020AS204 / 0B30066
- HUSMH8080AS205 / 0B30189
- HUSMH8040AS205 / 0B30188
- HUSMH8020AS205 / 0B30187

### Configuration

<table>
<thead>
<tr>
<th>Interface</th>

<tr>
<td>Idle (W)</td>
<td>2.2 / 2.1 / 2.1</td>
</tr>
</tbody>
</table>

### Physical

| Height (mm, max)  | 15.0 |
| Dimensions (width x depth, mm) | 70.1 x 100.6 |
| Weight (g, typical) | 164 |

### Environmental (operating)

| Ambient temperature | 0° to 60° C |
| Shock (half-sine wave) | 1000G (0.5ms) 500G (2ms) |
| Vibration, random (G RMS) | 2.16, all axes (5 to 700 Hz) |

1. One gigabyte (GB) is equal to one billion bytes, one terabyte (TB) is equal to 1,000GB (one trillion bytes), and one petabyte (PB) is equal to 1,000TB (one quadrillion bytes) when referring to solid-state drive or hard drive capacity. Accessible capacity will vary from the stated capacity due to formatting and partitioning of the drive, the computer’s operating system, and other factors.

2. MTBF target is based on a sample population and is estimated by statistical measurements and acceleration algorithms under nominal operating conditions. MTBF ratings are not intended to predict an individual drive’s reliability. MTBF does not constitute a warranty.
